Abstract

This study aims to identify the status of The university environment by faculty members in two Palestinian universities (Palestine Technical University – Kadoorie- and the Arab American University of Jenin).

The study's population consisted of (462) academic staff members in both universities in the academic year (2018/2019). The study used stratified random sampling and consisted of (170) members at around (37%) of the study's population.

The study adopted a descriptive method which consisted of five fields and (52) paragraphs which were in turn verified via the appropriate educational and statistical methods and later analyzed using the Statistical Package for Social Sciences (SPSS) program.

The results of the study revealed that the perception of university environment by the sample in the two universities came at a high level with an average of (3.79) with students ranking first with an average of (3.83), while the faculty ranked last at a (3.74) average. The results also indicate that there are no statistically significant differences at the level($\alpha \leq 0.05$)between the averages of the sample of the study.

In light of the results of the study, the researcher recommended adopting the concept of University Environment and working on the development of an attractive environment that meets the needs of the students and the faculty members.

Keywords: University Environment, Palestine Technical University (Kadoorie), Arab American University, Faculty, Supportive Environment.
